Office of Legislative Counsel - Journal  
Thursday - 5 March 1959

Page 2

Subsequently Mr. Edward Duffy, Administrative Assistant to Senator Butler, called on the Modelski request. He was briefed on the Agency policy concerning disposition of these books and the budgetary problems involved if disposition were made to private individuals. Mr. Duffy indicated that he understood completely and inquired as to whether six back issues of the reports could be made available to their office for transmittal to General Modelski. Since we had indicated to Mr. Duffy that we would be pleased to add the Senator's name to the mailing list if he so desired, we informed him that we would be only too glad to make these copies available to the Senator's office. Although Mr. Duffy declined the offer to have the reports sent to the Senator's office, he indicated that they might request specific reports if necessary. He also said that they would explain to General Modelski our problem in distributing these materials. He was very pleasant and was most appreciative of our cooperation to this extent.

STAT

7. [ ] (OSI) called in connection with our referral of Congressman Victor L. Anfuso's (D., N. Y.) recent science academy proposal. He indicated that while scientists in general were not in favor of any of the science academy bills, he was somewhat unwilling to indicate this in writing. He did point out in connection with Anfuso's letter to the Director, however, that there was a sharp distinction between the Soviet academy of sciences and the U. S. academy proposed in Anfuso's bill. The Soviet academy is established to encourage research at graduate levels rather than to encourage scientific study at the undergraduate level. An appropriate response will be prepared for the Director's signature.

JOHN S. WARNER  
Legislative Counsel
